

# Microfiber Washing Tips

When washed properly microfiber can last **hundreds of washings**.  
Follow these **simple tips** to maximize the life of your microfiber.

## WASHING:

- Wash separately
- Don't mix with terry or cotton towels to avoid lint
- Wash in cool or warm water 105° or less

## DETERGENT:

- Use a mild liquid detergent
- No bleach
- No fabric softener - will clog fibers

## DRYING:

- Tumble dry low heat, air dry, or place in an extractor
- Avoid placing in hot dryer
- High heat melts fibers making them non-absorbent
